

# TReK Information

---

- TReK 4.3.0 will be delivered April 29, 2016. This release will contain the following:
  - Updates to TReK HPEG software to align with the latest HOSC PGUIDD updates for Ku IP.
  - A new TReK HPEG API to provide programmatic access to TReK HPEG information.
  - Updates to the TReK CFDP software to support filestore directives when running native CFDP.
